

## SOLOMON BAYE

**Cybersecurity & IT/ICS Security Architect | Enterprise Security | MSc Control Engineering** Addis Ababa, Ethiopia  
(Open to Global Remote) | solelectr@gmail.com | +251 911 506 932 [LinkedIn Profile](#) | [GitHub Profile](#)

## PROFESSIONAL SUMMARY

Highly accomplished Cyber & Enterprise Security Architect with over 8 years of experience safeguarding critical telecom, enterprise IT, and operational technology (OT/ICS) environments. I am a senior practitioner of TOGAF and SABSA, specializing in designing large-scale Identity and Access Management (IAM), Zero Trust architecture, and comprehensive GRC frameworks. Leverages a unique foundation in Control Engineering (MSc) and Electrical Engineering to bridge the gap between physical infrastructure (OT) and digital security. Proven track record of reducing enterprise risk by 40%, securing 50,000+ identities, and driving secure digital transformation. Actively building full-stack applications (React.js) to deeply understand modern AppSec and DevSecOps pipelines.

## CORE COMPETENCIES

- **Security Architecture & Frameworks:** TOGAF, SABSA, ArchiMate, Enterprise Architecture (EA), Security by Design.
- **Cybersecurity & Identity:** Zero Trust, IAM (IBM IAM, OAuth, SAML, MFA, SSO, RBAC), SIEM, WAF, Anti-DDoS, Threat Modeling.
- **Governance, Risk & Compliance (GRC):** ISO 27001, NIST CSF, CIS Controls, GDPR, ISO 31000, IT Auditing (CISA Candidate).
- **OT/ICS & Infrastructure Security:** IT/OT Convergence, SCADA/PLC Concepts, Secure Converged Networks, Cloud (AWS/Azure).

## PROFESSIONAL EXPERIENCE

**Ethio Telecom** — Addis Ababa, Ethiopia *Information Security Architect* | Jan 2024 – Present

- Strategically lead enterprise security architecture and roadmaps using TOGAF & SABSA methodologies, directly aligning security investments with critical business outcomes and operational resilience for a major national telecom.
- Architected and directed the end-to-end implementation of an IBM IAM program, managing vendor integration and rollout to safeguard 50,000+ identities and optimize lifecycle provisioning.
- Championed the enterprise-wide adoption of Zero Trust principles; designed micro-segmentation and identity-centric access controls to drastically reduce lateral movement and enhance threat detection.
- Executed robust risk & compliance programs (ISO 27001, NIST CSF, CIS), achieving a 40% reduction in assessed enterprise risk and significantly boosting global audit readiness.
- Governed cloud security posture across AWS/Azure environments, mapping controls to CSA CCM to enforce stringent regulatory requirements across hybrid deployments.

**Ethio Telecom** — Addis Ababa, Ethiopia *Network Engineer* | Dec 2019 – Jan 2024

- Engineered and hardened routing, firewalling, and Wi-Fi access controls, contributing directly to a 99.9% network uptime for critical, large-scale services.
- Managed large-scale infrastructure deployments including MSAG to MSAN migrations and FTTH/Copper rollouts for 3,000+ customers, collaborating closely with vendor teams (Huawei) on security planning, configuration, and endpoint acceptance.
- Provided crucial security design and operational input for early enterprise cloud integrations and hybrid network architectures.

**Ethio Telecom** — Addis Ababa, Ethiopia *Customer Service Consultant* | Sep 2016 – Nov 2019

- Served as the primary first-line escalation point for complex technical incidents, conducting root-cause analysis and swift remediation with engineering teams.
- Proactively introduced client-facing security awareness practices, maintaining a 95%+ customer satisfaction rate.

## SELECTED PROJECTS & CONSULTING

- **Enterprise Architecture Consulting:** Advised major engineering clients on Enterprise Security Architecture (ESA). Developed governance roadmaps, HLDs/LLDs, and tool selections aligned with TOGAF/SABSA standards.
- **Interactive Educational Applications (React/JavaScript):** Developed highly interactive, state-driven web applications (e.g., CISA Exam Simulator) to modernize learning. Implemented secure frontend architecture, demonstrating hands-on expertise in the Software Development Life Cycle (SDLC) and Application Security.
- **WAF & Anti-DDoS (Radware) Deployment:** Validated vendor designs, integration plans, and HLD/LLD acceptance criteria prior to operational handover for critical enterprise perimeter defenses.

## EDUCATION

**Master of Science (MSc) in Electrical & Computer Engineering (Control Systems)** *Addis Ababa University* | 2016 - 2019

- **Thesis:** *Non-linear Adaptive Artificial Neural Networks Control of Municipal Wastewater Treatment Plants.* (Demonstrates advanced capability in analyzing and securing critical infrastructure/OT systems).

**Bachelor of Science (BSc) in Electrical, Electronics & Communications Engineering** *Addis Ababa University* | 2010 - 2015

- Graduated Top 5 in class.

## CERTIFICATIONS & CONTINUOUS LEARNING

- **CISA (Certified Information Systems Auditor)** – ISACA (Candidate - Actively Preparing)
- **Cloud Security Architecture for the Enterprise & SABSA** – LinkedIn Learning
- **CompTIA Security+** – LinkedIn Learning
- **Technical Proficiencies:** IBM IAM, Huawei AAA & VDI, Radware WAF, SIEM, AWS, Azure, Linux, ArchiMate.
